REGULATIONS

14. All the parts of the image have to be photographed by the author who is holding the copyright of all works submitted.

By the sole act of submitting his/her images or files to a salon under FIAP Patronage, the entrant accepts without exception and with no objection the following terms:

- that FIAP will use any means at its disposal for this undertaking
- that any refusal to cooperate with FIAP or any refusal to submit the original files as captured by the camera, or failure to provide sufficient evidence, will be sanctioned by FIAP,
- that in case of sanctions following the non-compliance with FIAP regulations, the name of the entrant will be released in any form useful to inform the breaches of the rules.

In order to help a possible investigation, we advise to leave the EXIF data of submitted images.

15. The reproduction of the entered works is allowed in the printed or digital catalogue, except when expressly prohibited by the author.

16. Definitions:

Definition of Nature Photography

Nature photography is restricted to the use of the photographic process to depict all branches of natural history, except anthropology and archaeology, in such a fashion that a well informed person will be able to identify the subject material and certify its honest presentation. The story telling value of a photograph must be weighed more than the pictorial quality while maintaining high technical quality. Human elements shall not be present, except where those human elements are integral parts of the nature story such as nature subjects, like barn owls or storks, adapted to an environment modified by humans, or where those human elements are in situations depicting natural forces, like hurricanes or tidal waves. Scientific bands, scientific tags or radio collars on wild animals are permissible.

Photographs of human created hybrid plants, cultivated plants, feral animals, domestic animals, or mounted specimens are ineligible, as is any form of manipulation that alters the truth of the photographic statement.

REGULATIONS

No techniques that add, relocate, replace, or remove pictorial elements except by cropping are permitted. Techniques that enhance the presentation of the photograph without changing the nature story or the pictorial content, or without altering the content of the original scene, are permitted including HDR, focus stacking and dodging/burning. Techniques that remove elements added by the camera, such as dust spots, digital noise, and film scratches, are allowed. Stitched images are not permitted. All allowed adjustments must appear natural.

Colour images can be converted to greyscale monochrome. Infrared images, either direct – captures or derivations, are not allowed. Images used in Nature Photography competitions may be divided in two classes: Nature and Wildlife.

Images entered in Nature sections meeting the Nature Photography Definition above can have landscapes, geologic formations, weather phenomena, and extant organisms as the primary subject matter. This includes images taken with the subjects in controlled conditions, such as zoos, game farms, botanical gardens, aquariums and any enclosure where the subjects are totally dependent on man for food.

Definition of the black and white photography (monochrome)

A black and white work fitting from the very dark grey (black) to the very clear grey (white) is a monochrome work with the various shades of grey. A black and white work toned entirely in a single colour will remain a monochrome work able to stand in the black and white category; such a work can be reproduced in black and white in the catalogue of a salon under FIAP Patronage. On the other hand: a black and white work, modified by a partial toning or by the addition of one colour, becomes a colour work (polychrome) to stand in the colour category; such a work requires colour reproduction in the catalogue of a salon under FIAP Patronage.

17. According to General Data Protection Regulation – GDPR (Reg (UE) 2016/679) we advertise that the personal data communicated in the framework of this international photographic contest will be collected and registered by GF "Il Cupolone" of Florence on papery, electronic, and/or informatic, and/or telematic media – protected and processed by procedures suitable to protect security and confidentiality fulfilling the requirements of Regulation.

REGULATIONS

We inform you that the data communicated by you will be used only for purposes strictly required by the competition and related to it. For this aim, in the framework of the event, your data may be published on line on the web site of the contest www.gfcupolone.net and www.trofeocupolone.it and/or on the catalogue of the contest. Giving your data is necessary for attending the competition. We inform you that you can exercise your rights (among them, just as an example, the right to obtain the confirmation of existence of data concerning you and their communication in an understandable form, the procedure of handling, the updating, the correction or integration and cancellation of data) by means of request to the Responsible Board of data treatment, without any formality. Responsible Board of Data Treatment is GF "Il Cupolone" of Florence, through its pro tempore President, Simone Sabatini. At any time, the competitor may ask the cancellation of his data from the list of participants. In such a case the photos will not be evaluated and the fees will not be reimbursed.
